

Amendments to the Specification:

On page 5, amend the paragraph starting on line 9 as follows.

-- The second-mentioned problem, namely the provision of a kit for the ~~abovementioned~~ above mentioned level sensor which can be used with as few components as possible in different fuel tanks is solved, according to the invention, in that two clips are provided, one of the clips having, on its side facing away from a magnet of the position sensor or a contact of the potentiometer, a bent portion for securing the lever wire, and the other clip having the bent portion on the opposite side. --
